## Our Motion Pictures

Our eyes have not failed us, we have failed our eyes. Truth of the statement lies in our movie theatres schedules which are largely written by popular demand. Local film selection has improved greatly in the last year, and Louie and Jerry Gold, managers of local and Pahokee theatres, present a plan which would prove a valuable contribution to the community's cultural program.

Since popular appeal largely dictates movie schedules, many English films and more sophisticated dramas are unprofitable for showing before average audiences.

With cooperation of a local civic club or organization, these plays can be brought here. If the plan, suggested by the Gold brothers is adopted, local citizens will no longer have to journey into nearby cities to see these films on rare occasions when they are shown there.

The Gold brothers say that they will bring a series of English films to the old Everglades Theatre providing a local organization sponsors the project. Set up like an artist series, the entire program would be covered by season tickets. The audience would be drawn from Belle Glade and surrounding communities.

Progress in local movie programs has been made as a result of cooperation between the Woman's Club, the Parent Teachers Association and the Gold brothers.

Mr. M. K. Bishop is chairman of the school committee for selecting and recommending educational and suitable films for high school students. So far several of these suggested films have been shown here although some of them cannot be obtained, according to these sources.

Realizing their responsibility is great, the Gold brothers say, we welcome criticism and suggestions. Motion pictures have become a public utility and one of the most powerful agencies for dispensing information and ideas. The moving celluloid greatly influences actions and ideas of the moving group, which includes the entire American public.

Atomic Energy Being Used Constructively in Farming Research

When the word "atomic" is mentioned today, many folks immediately think of the atom bomb. But there is another wonderland thing known as "atomic energy" is also being put to good peace-time use. Knowing of the devastation wrought by the bombs that were dropped on Hiroshima and Nagasaki, it is natural to perhaps for many of us of atomic energy research to be apprehensive. But it is well for them to think more about constructive ways in which atomic energy is being used.

The University of Florida Agricultural Experiment Station was one of the pioneer stations in testing atomic energy for purposes that would be helpful to mankind, and it is continuing to use it in agricultural research. The Florida Station was the first to administer radioactive phosphorus, cobalt, and carbon to living, more about the distribution and functions of these essential elements in the animal's body.

Through use of the radioactive minerals and the Geiger counter, scientists learn where the animal is in the animal's body and through observation and examination of the animal they learn what effect they have. Already they have

learned much they did not know before about animal nutrition.

As research goes on, it is almost certain that many findings of importance to livestock owners will be made. Important facts are also being revealed in similar research with soil and plants.

Speaking at the University of Florida not long ago, Dr. D. C. Comar, former biochemist with the Florida Station and now director of the University of Tennessee Atomic Energy Commission agricultural research branch, Oak Ridge, predicted that use of radioactive materials in agricultural research will expand greatly during the next few years and produce results that will have a significant bearing on crop production and livestock nutrition.

The constructive use of radioactive materials in agriculture, therefore, is a cheering note to folks who have become accustomed to thinking of atomic energy only in terms of the destructive force that was used in World War II.

Co. Commission To Control International Airport Lands

A change in a lease agreement between Palm Beach County and the General Services Administration brings all lands within International Airport under jurisdiction of the

animal's body.

With the help of the Geiger counter, scientists learn where the animal is in the animal's body and through observation and examination of the animal they learn what effect they have. Already they have

county commission, was applied Monday by the commission.

As explained by County Attorney Harry Johnson, the change in lease would bring under his jurisdiction lands which had been made available for use by the Palm Beach school board and which is now being used for Palm Beach Junior College. The new lease agreement Johnson says provides that the county shall control the use of the former airfield subject to the school boards use of certain areas for educational purposes. The new agreement, Johnson said, will run for ten years.

FRANK LEO MARK STUDIOS  
WILL PRESENT STUDENTS  
IN RECITAL JUNE 8th

A unique recital and reception will be given at the Country Club of the Everglades on Thursday night, June 8, by the students of Frank Leo Mark Studio of Music, West Palm Beach. The students will be presented by Mr. Mark, who will preside as master of ceremonies.

The piano (furnished by Leggett Music Company) will be in the center of the room, surrounded by brightly decorated tables where the guests may partake of refreshments while the students perform.

Feature numbers will be Warsaw Concerto, played by Marianne Womack; Malaguena, by Patty Ingram; Morton Gould's Pavane, by Jackie Berry; Cliffs De Lune, by Lucretia Campbell; A paraphrase on Missouri Waltz, arranged by Mr. Mark, and played by Billy Bailey.

A flute duet arranged by Mr. Mark will be presented by Mr. Mark and Miss K. Vanderwater, by Patty Ingram and Clark Womack, who were original numbers written by Mr. Mark. "Your Love Is Stronger Than An Atom Bomb" and "Thanks Dear Lawd."

Miss Patsy Maxon of Canal Point will be presented guest soloist, playing Chopin's Fantasy Impromptu.

Only students, relatives, and friends are invited.

W.S.C.S. Circles Hold Joint Assembly Before Program

Circles one and two of the Women's Society of Christian Church met in joint assembly for a musical program at the Methodist Church, Tuesd a night. Several programs were conducted following dinner.

Mrs. John Schoenfeld presented the program at the J. O. Y. Circle, one entitled "God the Father of Jesus."

Members present were Mrs. Avery Arnold, Mrs. Lee Berthelot, Mrs. W. J. Newell, H. C. Collins, Mrs. A. W. Tregenza, Mrs. Clyde Doolittle, Mrs. Jack Hollingsworth, Mrs. E. M. Livley, Mrs. Ralls Mackay, Mrs. F. C. Schoenfeld, Mrs. L. F. Vanderwater. Visitors at tent included Mrs. O. Gangstad, Mrs. R. V. Allis.

Following the program refreshments were served by hostesses, Mrs. H. C. Collins and Mrs. Clyde Doolittle.

Circle chairman, Mrs. Frank Morris, conducted the business session in circle two.

The program for the study book, "Jesus, God and I", was given by Mrs. Sidney Smith, Jr., Mrs. W. A. Thiebaud led devotional.

Attending were: Mrs. Frank Morris, Mrs. Arnold, Mrs. H. C. Collins, Mrs. William Foster, Mrs. M. Leonard, Mrs. S. K. Smith, Jr., Mrs. Robert Creech, Jr., Mrs. William Thiebaud, Miss Sarah Diggs, Miss Mary Alma Murphy, Mrs. William C. Young, Mrs. E. Felsing, Mrs. John Wood, Mr. John Winburn, Mrs. L. Wright. Hostesses, Mrs. Anna Keene and Miss Sarah Diggs, served refreshments.

Corn Goes From Fla. Fields To N. Y. Tables In Matter Of Hours

New Yorkers are eating Florida corn before the stuff gets a chance to become acclimated to Yankee weather.

Corn at Ruskin, for instance, is picked in the morning and brought to a pre-packing plant where it is shucked, washed, processed, dried, wrapped and cased in less than 45 minutes. It is often on its way to New York, Chicago, or another Eastern town within another hour. Three or four hours direct flight and it's there.

Keep an eye on temperature, you can by means of refrigerated trucks and planes, the Florida corn never suffers from its trip north, and all the natural sweetness is retained.

Florida Grower Magazine's May issue says Paul Dickinson Farms, Ruskin, has supplied corn to markets east of the Mississippi. Dickinson has been a leader in the pre-packing industry in Florida. He has

Why "Moose" Changed His Mind

experience and all." (Moose used to play a little semi-pro ball.)

That did! Next day Moose put up a little over his fence. In return, the kids had to use any doorway. From what I see, you try to understand the other fellow's point of view-like his personal preference for beer or coffee—and then take into consideration the will of the majority, why, things seem to get better all around.

Andy's Garden Tavern, Doe says, this year Moose up, Moose. We were thinking of asking you to um...what with your professional

After the ceremony, the young cattlemen, who designed a Circle L. Although many other Circle L's were presented, the judges felt that Calvert's creation came closest to adaptability on a branding iron. Calvert's prize: a brandng iron, a wheelbarrow made of plastic.

S. K. Smith, Sr., was awarded second prize, a plastic rocking-horse for the purpose of chasing runaway mavericks. George Murphy, third place winner, was presented a tiny plastic horse mounted by the twister Walt Thames, who said that the gatet would be used only on the club's pasture grass to prevent photo-sensitivity.

At twenty five, make it six; I get six, make it eight; at eight make it nine; at nine make it twelve; at twelve make it 23 and half; 28; 28; make it nine; at twenty five, make it a half. Oh, alright, sold to Armour at 29. Business is good today, Chicago prices right here in Belle Glade."

He then spoke to the young cattlemen. "I'll just make a thousand to 1200 pound hunk of beef out of him in a year, on Florida grass, sunshine and rain, with a ninety-day confinement before selling him."

Miss Nannie R. Burdette, of Chautauqua, presented a pin to the Demolays. She said the pin was a very nice gift.

Pontiac Engineering Center  
To Be Finished In The Fall

Construction of Pontiac Motor Division's magnificent new Engineering Center is proceeding well and completion has been scheduled for this Fall, according to H. J. Klinger, general manager.

Following the ground-breaking in December, and after

some delays caused by weather conditions, the project made rapid strides. Most of the structural steel is now in place and some roofing operations have begun.

When completed, the Pontiac Motor Engineering Center will be, as Chief Engineer Delaney has said, "The finest machine for engineering we have been able to conceive. It will also be an aesthetic asset to the City of Pontiac."

Well set back will be of maroon face brick with white cut stone trim, a trim and appealing part of two-story structure providing 213,645 sq. ft. of working space. The first floor will be of parking will be provided.

Inside, the Pontiac engineering staff, which rates among the most progressive in the industry, will find every conceivable aid to their talents, including ample space and the latest in equipment.

The first floor in addition to repair garages, will contain what Mr. Delaney terms "A very highly specialized automobile factory exactly suited to our engineering needs."

Here, too, will be the Dynamometer Room where the power of engines and the Durability Room where the power of engines can be exactly measured and the Durability Room where the power of engines are "murdered" in the cause of better service for the public. In the Durability Room engines are literally run to death, top speed for a month, exposing any hidden flaws under the brutal prodding.

On the first floor also will be a carburetor flow room, instrument laboratory, stress laboratory and a "Cold Room" where temperatures will be driven down to 40 degrees below zero for testing operations under Arctic conditions. A "Screen Room", lined with sheet copper will cut off all

**RELIEVES  
DIAPER RASH**  
You can get rid of diaper rash with Soothing, medicated LYCO-BO-ROL. It is safe for all skin irritations. All day, all night. Money back if not pleased.

**LYCO-BO-ROL**

**Woman Nearly Explodes  
With Stomach Gas**

"I was filled with so much gas that I was sure I would explode," said a woman living in Sarasota, Fla. "I used to get such pains after eating that I would double up in a kind of cramp-like agony. It caused me to have painful heartburn, and I was always spitting up acidulous liquids. From the very first dose SURE-LAX brought relief. No more choking up in a gas. The terrible pain eating has gone. SURE-LAX has been worth a million dollars to me."

SURE-LAX is a new medicine that goes right to work, giving symptomatic relief from burning stomach and anal gas, preventing cramps from hyperactivity. Miserable people soon feel different. Don't go on suffering, get SURE-LAX. Sold by Glades Drug Store.

electrical and atmospheric interference and allow testing of car radios under ideal conditions.

Adjacent to the Dynamometer Room will be a "Quiet Room" so highly insulated that absolute quiet prevails. Here the slightest unwanted noise in transmission, clocks or other parts under observation can be specifically detected and exposed for correction.

Instruction covers everything from taking temperature and pulse to the special dressing and undressing routine for care of contagious cases.

Nutrition for the sick, hot and cold applications, exercise with chair exercises, professional ethics, treatment of patients, bed baths, shampoos, preparing surgical carriage and care of babies number among the subjects included. The information really comes in handy in family life too, group members report.

Lessons are thoroughly organized on a written sheet outlining purpose, equipment, procedure and cleaning equipment.

When fully qualified, the nurses' aids will be given instruction in nursing, just as regular nurses receive, outlining their special duties.

They are looking forward to the day when they can perform duties in their trim new blue denim uniforms as "official Red Cross nurses' aids."

Remainder of the second floor is given over to a spacious, airy drafting room, photostating and specific engineering departments. There will be a room for showing of models of future products to selected groups. This room will have a domed ceiling without visible support, and a separate room for luncheon groups and for banquets.

There will be a room for showing of models of future products to selected groups. This room will have a domed ceiling without visible support, and a separate room for luncheon groups and for banquets.

The Community Methodist Choir, under the direction of Miss Ruth West, will present a sacred concert in the Church, Sunday afternoon, May 28, at 5:00 o'clock.

A free-will offering will be taken.

Conductor for the Choir will be Miss Marianne Womack, organist and pianist.

The public is cordially invited to attend.

Following is the program which the 28 voices will present: *My God, To Thee, I Lift This Prayer*; *For Christ Our God, Lector; Remember Our Prayer*; *Rubinstein; Remember Now Thy Creator*; *Amen*; *Praise Ye The Father, Gounod*; *Listen To The Lambs, Dett*; *Fanfare*; *For Christmas Day, Smith*; *Angels We Have Heard, Hope And Love, Shelia Beach*; *Uphill Savior, Christiansen*; *The Lost Chord, Sullivan*; *Jesus, Friend Of Sinners, Grieg*; *My People Go, and Little David Play On Yer Harp, Negro Spirituals*; *If God So Cloths The Grass, Phillips*; *Jesus Christ, Bernardi*; *Hallelujah Chorus, Handel*; *The Lord Bless You and Keep You, Lukin*.

**LEGION AUXILIARY APPROVE  
SELECTS FOR GIRLS STATE**

The American Legion Auxiliary met at the Legion Hall Monday night with newly elected president, Mrs. Edith Kirchman, presiding.

Names of two girls selected by the High School Faculty to attend Girls State, Tallahassee June 20-24, were presented: Margene Mathewson, first, and Lucretia Campbell as alternate. The Auxiliary voted acceptance of the faculty's choice and will sponsor the girl attending. Both girls are from South Bay.

Plans were made to hold social meetings with the post during summer months.

Rehabilitation work is scheduled for the informal meetings to be held at the homes of the members during the coming months.

The assembly voted to again make citizenship awards to eligible students.

Refreshments were served following the business meeting.

Hostesses were Mrs. Eileen Allen and Mrs. Irene Willis.

## This Week's Sermonette Is Written By Elder

Curtis Slade, Church of Jesus Christ of Latter Day Saints, Belle Glade.

**Power Of Personality**

The greatest thing in life is not to make money, but to raise ourselves to our highest power. So call out the hidden beauties of our nature and to make ourselves attractive and helpful instead of repellent and unsympathetic. The charm of manner which comes from a generous well-wishing heart, a heart that longs to scatter sunshine and to fling the perfume of gladness and happiness wherever he goes—that is wealth compared with which mere money wealth looks contemptible.

We should not begrudge any expense, time or effort, within our reach which will add to our personal wealth, which will increase our influence for good.

The coldest hearts are warmed and the stubborn natures are subdued by the charm of a beautiful soul.

Scatter flowers of good cheer wherever we are, are an infinitely greater and nobler achievement than to pile up millions of cold unsympathetic dollars.

If you do not respect yourself, others will not, and if you cannot win respect it will be impossible to influence people for good.

## SOUTH BAY BEAN CITY LAKE HARBOR

Mr. and Mrs. Hilton Bell were called home recently from Colquitt, Ga., by the illness of their mother Mrs. L. L. Simmons. Mrs. Simmons is now improved in health.

Mrs. Ethel Hartline has returned home from an extended stay at Round Mountain, Ala., where she took care of her invalid mother for several months until the latter's death.

Mr. and Mrs. Alvin B. Crow, their daughter, and grandsons Malcolm, Hitchcock, arrived to their new country home near summerfield the last of the week. Mr. and Mrs. Horace H. Walker, who purchased their home here, moved in over the weekend.

Mr. A. B. Barnes has returned from a tour of the state during which he visited friends and relatives at Island Grove, Mayo, Gainesville and other points.

Mr. and Mrs. Curtis Miners moved to Greencarre over the weekend.

Rev. Harry Wilson, former pastor of the South Bay Baptist Church, will receive his degree of doctor of divinity at Mississippi College, Clinton, Miss., on May 29.

Mr. F. W. Mutchler of West Palm Beach spent a few days this week at her home in South Bay, and visited Mr. and Mrs. Herbert Priest at Chosen.

Mr. and Mrs. Michael Broda and two children of Miami were the Sunday guests of Mr. and Mrs. C. E. Crichton.

Mrs. J. C. Bowen and two

sons visited her mother Mrs. Marie Mullin in Miami Beach several days last week.

### Card Game Results In Shooting Of Negro Saturday

Henry Callwell, colored, aged 45, was shot through the right shoulder at the South Bay quarters early Saturday morning and taken to the Belle Glade Memorial Hospital for treatment.

Tommy Chastain, Samuel Johnson and Ossie V. Collins, the other three negroes in the room where he was shot were taken to the Belle Glade jail and held for questioning. They stated that an unidentified negro had threatened to kill him the fact that he was not permitted to take a hand in their card game.

Chief of Police R. C. White, Highway Patrolman V. A. Shifflet were at the scene of the shooting and arrested the wrecker in charge of the bridge. Cars and trucks were held on both sides of the bridge in great numbers awaiting clearance.

### Fla. Cattlemen Consider Building Underpasses

Cattlemen of Florida believe the state should consider building livestock underpasses at strategic locations under new Florida highways, it is announced by Elmo L. Elmore, State Cattlemen's Association.

The board of directors has passed a resolution making this suggestion and has forwarded it to the State Road Department. Griffin states. Highways will be made even safer if it is not necessary to drive cattle along or across them, the resolution points out.

"Construction of underpasses under existing highways may be too expensive," the association's assistant secretary says, "but the directors believe such projects could be constructed at a reasonable cost if they were planned when the highway was planned."

The resolution requests various counties and other authorities constructing highways to consider the problem, giving particular consideration to the question of highway safety, as well as to the economic injury to which various ranches may be subjected.

"Our directors think this problem will become more acute in the years to come," Elmore says. "In many instances, cattle have been made" Griffin adds.

Printing is the fifth largest highway in the air.

Myrrh, one of the gifts brought by the Wise Men, is a small scrubby tree growing in Arabia, Somaliland and India.

The bark of the tree excludes a gum-resin used in medicine.

The resin comes in the form of

small, round, hard, resinous points cut off. "After all, if a new highway cuts off a small sec-industry in the world.

tion of improved pasture, the cattleman will be unable to abandon the section due to his high investment. Consequently, it will be necessary to drive cattle across highways with attendant inconveniences and danger to motorists."

### Florida Produce Shows

Per Acre Yield Increase

A definite increase in per acre yields of Florida fruits and vegetables resulted last year in the production of 5,814,800 tons of food and feeds, the Florida State Chamber of Commerce reported.

Florida farmers and growers have averaged a greater per acre harvest from all leading agricultural crops in Florida since 1940 than they did during the ten years prior to 1940.

Soil and plant research, followed by practical applications of the findings, is credited as the one prime reason for the increased current yields in this year's business review of the Chamber's research and industrial division.

Special crops for which comparable acreage figures are available show: Lima beans up from 69 to 82 bushels per acre; celery from 470 to 480 crates; eggplant from 100 to 151 crates; cabbage from 61 to 100 bushels; eggplant from 241 to 264 bushels; peppers from 237 to 259 bushels; tomatoes from 100 to 124 bushels; potatoes from 120 to 155 bushels; peanuts for shelling from 558 to 775 bushels; cantaloupe from 100 to 282 melons and tobacco from 847 to 908 pounds. Corn, various hays and most field crops are also showing improvement. In only a few crops is a decline reported.

Myrrh, one of the gifts brought by the Wise Men, is a small scrubby tree growing in Arabia, Somaliland and India. The bark of the tree excludes a gum-resin used in medicine.

The resin comes in the form of small, round, hard, resinous points cut off. "After all, if a new highway cuts off a small sec-industry in the world.

# Did you ever stop to think what you get for your telephone dollar?

In a single day, you may use your telephone many times to run errands . . . make appointments . . . visit a neighbor down the block . . . handle matters of business . . . and receive an important call from someone miles away.

In the course of a month, you repeat this performance many times. Day and night, around the clock, in good weather and bad, the telephone serves you . . . saving time and steps, work and worry . . . enriching life for all the family. What other purchase do you make that provides so much all-round service and satisfaction at such small cost?

*Southern Bell Telephone and Telegraph Company.*

so much service      so little cost

## Summer Band Program Will Begin June 19. Students Urged To Enroll At Once

A summer band program sponsored by the State and county, will begin in Belle Glade June 19, under the supervision of Band Director, Howard Payne.

The program is designed to replace grades nine and eleven, bring in new members, and furnish free instruction to students in third grade or above, who would like to have it. Nine band members will graduate and new members will be urgently needed to replace them.

Individual and group work will be offered throughout the summer and students may register for one month or for the two month period. Eliminating unnecessary cost to participants.

One fundamental reason for the progress that has been made in Florida livestock during the past few years is the enthusiasm with which farmers and cattlemen are going about the business of improving their hogs and cattle.

The type of farmer and cattlemen who is succeeding in livestock production is he who is out to get all the information he can about livestock and uses it in his livestock enterprise. And there are many farmers throughout this type in Florida, which explains why progress is being made and prospects for future progress are bright indeed.

One can see these successful producers scattered day and night by the Florida Agricultural Experiment Stations and at other events of this nature. More than 700, representing all parts of the state, attended the recent Livestock Producers Field Day at the University of Florida and the University of Florida and similar field days at the Range Cattle Experiment Station at Ona and at the North Florida Experiment Station at Quincy.

In the business of raising hogs and cattle for market, they

ents, a number of school instruments, and equipment available for new students to use.

For information as to schedules, instruments, group practices, etc., phone Mr. Payne, 2820 or 2938, or fill in the blank below and mail to Mr. Howard Payne, Box 217, Belle Glade, Fla.

Producers Show Great  
Enthusiasm In Effort  
To Improve Livestock

are familiar with the opportunities, advantages, and problems connected with their enterprises, and they are seeking research information that will help them to improve their herds, produce higher quality meat, and increase their income. At the Main Station in Gainesville, for example, they heard research leaders tell about the feed requirements for livestock, the need for continued efforts to improve livestock by breeding, and some of the methods used to improve their stock.

The cattlemen and animal husbandmen and others who attended the field day brought out problems which they face, and they conferred with the scientists and each other on possible ways of solving these problems. They know they have adequate feed which the state as a whole does not have now—and they know that good breeding is necessary to produce animals that will develop into the type that sells readily on the market for good prices. Livestock breeders are aware that they have made progress in both of these fundamentals, but they also know that they must keep striving for more progress in the future. And they are earnestly and enthusiastically doing just that, as indicated by the way they turn out for field days.

Henderson Says  
Plan Ahead For  
Planting Grass

For improved pasture plantings during the summer rainy season, make your plans now, the University of Florida Agricultural Experiment Service advised farmers today.

Because newly planted grasses stand a better chance of survival if they receive adequate moisture, the season of regular rains in summer is best for plantings, especially in well drained soils, said Agricultural Researcher Russell Henderson pointed out.

"Time, labor, and money can be saved if the farmer will decide on what grass he is going to plant, prepare the land, obtain seed and fertilizer, and make other arrangements before the soil so well he needs to begin as soon as the weather turns off right," Mr. Henderson said.

The Extension worker offered these suggestions:

Clear land of stumps, brush, and trees not needed for shade, burn brush, and then harrow and disk land with a medium or heavy tandem disk. Avoid tilling poor subsoil to surface. Broadcast limestone at the rate of one ton per acre or enough to raise soil pH to 5.8 or 6 a few weeks before planting.

For grasses on mineral soils, apply 300 pounds of 3-8-5, 4-10-7, or 5-10-5 fertilizer per acre at planting time; for grasses on peats and mucks, apply about 300 pounds of 0-8-14 or 0-8-16 per acre at planting time to old crop grass, as well as 600 pounds to new land.

A cultipacker with seeding attachment is best for planting grasses, but the seed can be sown uniformly with a hand seeder, covered lightly with spike-tooth or disk harrow, and then harrowed with a roller. Per acre seed requirements: Pensacola Bahia and carpet grass, 10 pounds; Common Bahia, 15 pounds.

For planting Coastal Bermudas, Pangola, St. Augustine, and Para grasses, 100 pounds of fertilizer is needed. Discard the cuttings from front of tractor equipped with a disk set at a slight angle and a cultipacker. If using sod pieces separate into small pieces and push into ground with a forked stick or scatter over land and cover with a light disk and cultipacker.

St. Augustine, Pangola, Coastal Bermudas, Carib, and Para are suitable for peats and mucks; carpet for low wet, medium-to-dark colored soils; carpet for mucks; Pensacola and Common Bahias, and Coastal Bermudas for dark, moist, sandy soils; Pensacola and Common Bahias, Pangola, and Coastal Bermudas for medium to light-colored flatwoods and well-drained sand soils; Coastal Bermudas and Common and Pensacola Bahia for well-drained medium and heavy soils with clay sub-soils in northwestern Florida.

Keep cattle off new grass pastures for at least two months after planting.

Reeves Thinks Cuba  
Can Use More Dairy  
Animals From State

The idea of Florida becoming an important source of produce for the cattle farms in Cuba and other Latin-American countries was voiced recently by Clarence W. Reeves, dairy specialist with the University of Florida Agricultural Extension Service.

## "YOU HARDLY KNOW THE ROAD IS THERE!"

the husky keel of a battleship to steady the whole carriage.

Low-pressure tires on wide, Safety-Ride rims, that stop heel-over and sway on curves.

Firm, sure, quick-acting shock absorbers, promptly snubbing the after-bounce of the bigger bumps.

The important thing is what these all add up to.

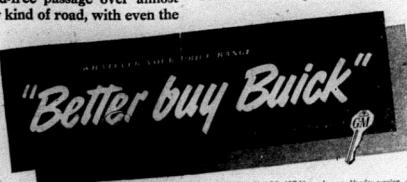

Freedom at last from jounce and jiggle. A level, floating, road-free passage over almost any kind of road, with even the

worst of them tamed and gentled as never before.

Add Fireball power to all this—the roominess of wide, deep seats—the lightness of Buick controls and the liquid silkiness of Dynaflow Drive—and you have a car just too good to miss.

Come try one, won't you? Your Buick dealer will be delighted to demonstrate without obligation—delighted to show you that if you can afford a new car, you probably can afford a Buick.

Standard on ROADMASTER, optional at extra cost on SPECIAL and SUPER models.
